

CONSOLIDATED CAMPAIGN RULES PLAYER AIDS FOR THE CAMPAIGNS OF NAPOLEON SERIES

Dick Vohlers has consolidated the rules for the NAB-series Campaign games into one series booklet, along with exclusive booklets for each game in the series (except Struggle of Nations). With this new main booklet, players no longer have to look at the Standard booklet, then the Battle rules, and then the Campaign rules.

In addition, those rules and tables that are truly "Exclusive" are either shown as exceptions in the main rules, or collated into new, separate, Exclusive Rules booklets for each game. Thus, those booklets contain mostly setup information, victory conditions, and lengthy rules that apply only to the given game (such as fortnights). Those Exclusive Rules that are incorporated into the main rules are distinguished by colored text so that players can scan for a given game easily. Generally, the color of the text used for each game is based on the color of the game's box: for example, rose for TETE and green for SUA.

These rules also incorporate all known errata, and make some modifications to rules of some games so that more recent system changes can be used with them. These Consolidated Rules are updated from the version published here in 2003.

For newbies, the Standard/Campaign split is still the best way to learn the rules. However, the veterans of the system may find these new consolidated rules more to their liking.

Caveat: We hope this approach will make it easier to play the games. However, these Consolidated Rules are not "official" and we will not answer questions about their use. We will of course answer game questions regarding the official rules published with the games, as amended in published Q&A.

The following files are available, all in PDF format:
